WORLD'S AIDS DAY

Student Health Services, Pride Center, and ASI Programming will be cosponsoring World's AIDS Day this year in the University Park. The purpose of World's AIDS Day is to focus the general public's attention on HIV/AIDS issues, spread the message that prevention works, open up dialogue about sexuality and behaviors, encourage the use of condoms, offer care to those infected with HIV or living with HIV/AIDS in their families, support the extension of care and preventative techniques to those otherwise excluded, and fight stigmatization and discrimination. There will be free HIV testing available at the Student Health Services, Bldg 46. To schedule an appointment please contact ext. 4000. For more information please contact ASI Programming at ext. 3610.
